PROJECTS & PRACTICAL EXPERIENCE

02/2026 – Current

Rebesta Fresh E- commerce Website & Live Business

Founder & Developer | rebestafresh.in

- Built and deployed an e-commerce website for a fresh vegetable-delivery business serving customers in Hosur.
- Personally developed backend APIs and database integration alongside the customer-facing frontend.
- Implemented core e-commerce functionality, including product management, shopping cart, admin dashboard, checkout, user authentication and payment workflows.
- Worked on production deployment and application operations using Google Cloud Compute Engine, PM2 and Caddy.
- Contributed to the business's digital presence, product presentation, customer experience and brand identity.

06/2025 – 07/2025

Rebesta Multi-App Food Delivery Platform

Founder & Developer | In Development

- Developing a food-delivery platform comprising four applications: Customer App, Delivery Partner App, Partner App and Admin App.
- Working on a multi-role digital ecosystem designed to support food ordering, delivery operations, partner workflows, and administrative management.
- Building the platform’s application structure, user experiences, and commerce related functionality.
- Focusing on coordinated workflows across customer ordering, delivery management, partner operations, and platform administration.

Smart Nest Smart Home Automation & 3D Interactive Webpage

Website Developer & 3D Experience Developer | Project-Based

- Worked on developing a modern website experience for a smart home automation business.

- Developed an interactive procedural 3D smart-home showroom with 3D room visualization, furniture, lighting and Shadows.
- Implemented orbit and zoom controls for interactive 3D exploration.
- Built a searchable and filterable sample-material catalog with surface selection and material details.
- Worked with modern web development and 3D visualization techniques.

ACADEMIC PROJECT

Augumented Reality Navigation for Visually Impaired Persons

Developed an academic project focused on using augmented reality to support navigation for visually impaired individuals. Explored technology-assisted wayfinding and accessible navigation experiences.

INTERNSHIP EXPERIENCE

Data Sciene Intern – *Make Vision*

- Performed advanced data cleaning,transformation, and exploratory data analysis (EDA) using Python and SQL.
- Designed and published interactive corporate dashboards with Tableau and Power BI to tracking key operational metrics.
- Delivered high-impact data insights and predictive findingsthrough structured reporting and automated visualization.

Cyber Security – *Orvionar Tech*

- Gained practical knowledge in cybersecurity conceps, network security, and ethical hacking fundamentals.
- Assisted in identifying system vulnerabilities and implementing basic security measures.
- Monitored network activities and supported threat detection and risk assessment processes.

PROFESSIONAL EXPERIENCE

Data entry operator Inbound

Flipkart warehouse, Hosur

- Skilled in maintaining accurate inventory records, processing shipment data, and handling warehouse documentation efficiently.
- Demonstrated strong attention to detail, time management and ability to work in fast-paced environments while ensuring dataaccuracy and operational support.
